Bangla choties app for android phone

There are dozens *Probably hundreds - of Android phones on the market today. Some of them are exclusive for specific vectors, some of them are available throughout the world, but only some of them are at the top of their class. This week we wanted to know What Android phones thought were the best available, not just because a high-end functional or high-end hardware lists complete, but why do you think you offer a great overall experience. Here is a look at the top five Android phones, based on yours Nomination. At the beginning of the week, we asked you what Android phones that you think was the best. There are many sites willing to tell you what the phones are the best based on the chips inside, the camera, storage or version of Android pre-installed, but those things are not always added to an excellent user experience. We asked you what *past or present - thought phones were the best, and OL Three 300 nominations later, we returned to highlight the first five. The survey is closed and the votes are counted! To find out which of the five contenders below followed the first prize based on your vows, go to our Alveairo Five Follow-Up Post to find out and discuss the winner! Looking for a decent Android phone? Of course, we know that the market will be completely different within a reading of Moresamsung Galaxy NoteSofeen indicated as "Phablet", because of its inclusive and massive stylus super amoled display 5.3 ", the Samsung Galaxy note (AT & T, \$ 299 W / contract) is enormous, but many of you praised to mix the portability of a phone with some real estate goods from desperately necessary tablets. The 8MP and 2MP rear and front cameras and the 1.4 GHz double-core processor do not damage The issues, and while it is certainly not the right size for everyone, those of you who have a love, and others do not see the time that comes its release on other couriers. Furthermore, even if the note galaxy ships with Android 2.3 Gingerbread pre-installed, there are many ROMs available to take it to the Sandwich Ice Cream Android 4.0 or simply replace the touchwid interface of Samsung entirely.HTC One X / STHE HTC One Series is the most recent actativ Or HTC to recreate himself, not the company really needs *most people who have used HTC devices love them and the HTC One X and one s are not exceptions to the rule. The only X (AT & T, \$ 199 W / Contract) is the new HTC tip phone, the 4.7 "sports screen, a quad-core NVIDIA Tegra 3 (internationally) or a dual processor -Core Qualcomm Snapdragon (US / Canada), Android 4.0 ICE Cream sandwich (with UI Sense HTC on top), built-in audio beats and a 8 MP rear camera with a 1.3pp front camera. HTC One S (T-Mobile, \$ 189 W / Contract) On the other hand, it is a 4.3 "slightly smaller screen, a 1.5 GHz double-core processor, 8MP rear and VGA front cameras, audio beats and ice cream sandwich. Both devices are thin, the Powerhouse devices designed to report the Focus Android Lovers back to a group Select high-end HTC devices, instead of dozen-plus HTC released in the past. So far, it works. SAMSUNG GALAXY S / S iThe Samsung Galaxy S series of devices are some of the world's most popular smartphones, and even if Samsung and Apple are involved in a patented cause exactly as it is similar to the galaxy the iPhone (And vice versa), which has not stopped the galaxy S and the Galaxy S II to sell millions of units around the world. The Galaxy S was one of the first Android dual-core smartphones, and certainly one of the first to present the new (at the time) Samsung's super love display, offering bright and crispy colors even in intense light. It is still available for a song a Of the courier you take it from (to the United States, it was sold under the vibrating name (T-Mobile), Captivate (AT & T), fascinated (verizon wireless) and Epic (sprint) in both 3G and 4G variants.) Party history, the Samsung Galaxy S II is the current model of the company and has a 4.3 "super amoled display, a 1.2 GHz double-core processor and while while while While With Android 2.3, most carriers have slowly rolling upgrades to bring the device to Android 4.0. Prices vary depending on the courier and of the variant that you collect, but one thing is certain: when it was launched, most people considered the Galaxy S II the best Android smartphone e â ~ "if it is not The best smartphone . . . available on the market, which makes the fury available on the market on the next Samsung Galaxy S III that Motorola's Motorolathe Droid Motorola.droid series (Motorola Milestone, internationally) was one of the first phones Android on the market to take really Android to the masses - and surely the first Android phone available on Verizon wireless at the moment. It was a hard call to group the Droid series together, but it is worth noting that those of you who named the Droid line in large numbers specifically mentioned the cursor models, not the Candybar models such as the Droid RAZR, Razr Maxx, or bionic (although all have all strong nominations), all available on Verizon Wireless in the United States. Motorola Droid 4 (VZW, \$ 199 W / Contract) is the current phone iteration, with a 4 "QHD display, a 1.2 GHz double-core processor, a 8 MP rear back and front cameras from 1 , 3 MP and in particular, a slide -out backlit keyboard that allows the phone to be used in both portrait and landscaping modes without sacrificing the real estate screen. The Droid line is still one of the few high-end Android devices to present one Physical keyboard, making it popular both for portability and with people who prefer physical keyboards to those on the screen. Android Gingerbread Sport Droid 4 and Rides Verizon Wireless' 4G Network.Samsung Galaxy Nexusthe Samsung Galaxy Nexus (VZW, Sprint, \$ 199 / W Contract, \$ 399 unlocked) is the official current "Google Phone", having launched with Android 4.0 Ice Cream Sandwich and currently acts as a peak Android device. Sport has a Super AMOLED 4.6 "screen, a o Curved outline screen, a 1.2 GHz double-core processor and a 5 MP and 1.3 MP back back and front cameras. It is a pure google experience, which means that the phone is (largely) free of bloatware and other apps pre-installed by vectors and producers, and lacks Samsung's ui ui level ui level in favor of a clean version Sandwich ice cream. The phone also sports the Google NFC payment system, Google Wallet. The camera boasts a zero shutter LAG, and it was the first phone to launch with the pre-installed ice cream sandwich, and it's still one of the few devices you can get this. If you want the true and more pure Android experience, or you want an Android phone that is officially supported by Google, this is. This to. There is true, the first five Android phones, based on your nominations. Now it's time to vote for it all of champ.it was difficult this week to run the first five considering that there are three Samsung devices in the race, but some of them have obtained more nominations than some other combined contenders. So we can combine ignore the fact that many of you have a strong opinion on these specific models. Do you have the thing to say about the candidates we've lost? Does your favorite phone does not have enough nominations to include? Remember, the first five are based on your most popular nominations from the call for the contenders thread from previous week. Share your thoughts in the comments below. The five hive is based on the reader's nominations. As with most of Hive Five's posts, if your favorite was left out, it's not because we hate him "it's because he has not received the requested nominations in the call The post of the contenders to make the first five. We understand that it is a bit of popularity competition, but if you have a favorite, we want to hear it. Have a suggestion for hive five? Send us an email to tips+hivefive@lifehacker.com! Pittaya Sroilong ofoto. Android has been around for more than a year, and at that moment the developers whipped some large apps. Whether you are a new Android owner or a pro looking for new tools, tools, 10 large and free applications belong to your arsenal.photo from Iwallenstein.we're going to go directly above the applications that are so common, universal, and well replicated on other mobile iPhone platforms or a user with a need probably them the Hunting Downa Facebook, Yelp, Evernote, Remember The Milk, and endless Twitter clients, widgets and applications. We also skipped on Google's ordered apps, like Google Voice, navigation and glasses, which are (or will) included the standart on new Android phones. Instead, we are aiming to shine a small light on apps that can easily offer excellent functionality for those who download them.Update: I moved taskiller for free up to a lower ranking, and modify its entry description a little, after some more Searches, off from some comments and emails Andro-savvy.10. Layarin Some ways, this is a vote for the potential of layar as much as the practical application. Walking through your phone and see Wikipedia's subjects, apartments for sale and what Twitter users have delighted through your phone is a rather accurate thing, and potentially useful when you're looking for things to do in a new city. But as Layar continues to add new levels, and how the camera and mobile processing power continue to improve, Layar could become much more interesting than already. One thing worth remembering is that if you don't like the view of the 3D camera, or as the appearance of yourself while you use it, Layar can only show the points of interest on a Google type map. Anyway that you use it, it's an intriguing aspect to what is happening around the corner. Taskiller FreeThe Negative aspect of Of Android is that sometimes some applications can become memory or bandwidth pigs unexpectedly fit, or bring the phone to their face when they break. A few apps provide a direct and simple "chit" option, however, and sometimes you can't get to the app to close it. Insert Taskiller, a free utility app-killing that works from its standard icon, or as one of a series of widgets you can add to the Home screen for a click To save oneself. The free version serves advertisements and lacks some advanced features, but generally serves the needs of anyone who tires you to need to actually reset the phone just to clarify space for, know, phone calls and such. Note: This app must be used as more than a last resort than the regular maintenance tool, killing processes and Willy-Nilly apps can disable alarms, kill background synchronization and have other non-intentional consequences.5. Slidescreenyou uses your Android smartphone differently from your desktop computer. Don't work with files and shortcuts, so that check-in on data flows that interests you - E-mail, text messages, Facebook and Twitter, chats and the like. Slidescreen replaces, or simply increasing, if you wish, the main phone screen, creating line after the message line and feed. Slide the central information bar upwards and down to look more or less of your items, scroll right to dismiss items like beds and finish having all your data on your hand at once. Slidescreen also replaces the standard application tray, offering 8 slots to put your apps most frequently accessible and tuck up all the others in a rolling bridge below. It's a total makeover for your phone, in other words - one that could simply make you fall in love with the concept of mobile data. Shoperokay, at the beginning we were rather skeptical of the application of Google's Shopper, since it only seemed a mashup of his Google glasses and Google's smart-smart apps like Shopsavvy. Then we actually used the shopper, and we were amazed both from what is accurately considered both barcodes and simple hedging shots, and how much it worked very quickly. It turns out, according to a developer who appeared in this week in Google, shopper is actually loading the image data on Google servers as it captures and decodes the barcode on the phone. The speed for the speed sake is beautiful, of course, but it's nice enough not to have to stand in front of a display of a book for a whole two minutes, waving the phone around a group of books you are trying to do the competitive price.
