There may still be an older iOS 9.3.5 compatible version that can work on the 3rd Gen iPad, but you will have to jump through some hoops to get it. See here: the iPad 3 was discontinued in 2012 and is no longer being updated by Apple. It cannot be updated beyond iOS 9.3.5. Its really not the best thing to buy at this time. Getting older versions of apps, now, that have moved on to more current iOS versions and newer hardware/iOS versions of apps is not a straight foward task, any longe and requires either access to another newer iDevice, or the use of an older version of iTunes on a computer connected to Internet to access the Apple Pencil, the Apple Pencil does not work with ANY older model standard 9.7 inch screen iPads made before 2015. The only iPads Apple Pencils work with are all iPad Pro models, the 2018, 9.7 inch screen iPad 6th generation. So, you may want to look at much newer iPad models. If you only can afford an older iPad, if you find an iPad 4th generation that has, at least, 64 GBs of storage (a 128 GBs model may be more preferrable, if you can find one), there are handful of very good drawing apps still available for that model with iOS 10 and earlier.
