The site is a treasure for many interesting topics that circulate throughout the web. Also, it's the best place to find online forums and discussions on anything. What makes it so attractive is its holistic nature: it's timely, interactive, personalized, eyes terrified, sometimes absorbing, and is really good. There's a lot to say which topics can be found on reddit for the absence of an editor to guarantee gateways which topics anyone can share. However, get the best Reddit application would help reduce aka subreddit themes. By the end of this article, we hope to help browse your topics in the Reddit world. So read for our recommendation of the best Reddit applications to download in 2021. 17 Best Reddit Apps to try in 2021. 1. Baconreader (Best Reddit App for Android and iOS) Photo of OneUder on Apple App Store Price: Free / \$ 1.99 peaks Baconreader Applications for anyone to browse the Reddit world. EA's The application that approaches the web version of the platform. Its features include down-voting or up-vote a topic, view of karma and sending / displaying messages among others. More recently, Baconreader developers have added a function of light and dark theme for easy reading convenience. But what distinguishes it is the ability to move to a subreddit view for a more tailor-made choice and restricted topics you like. The free version is a decent, but can be annoying if a ton factor of ads that appear from time to time. So, developers offer a pro version for \$ 1.99. Download Baconreader for Android Download Baconreader for iOS 2. Relay for Reddit (Best Reddit App for Android) Price: Free / \$ 3.99 Users Reddit are always hunting the best alternative Reddit app for their devices. SRE7492 User reddit is supported by many other reddit users in suggesting relay is one of the best reddit apps to try. The application has a fairly decent and simple user interface. Viewing topics would come as easy as tweet display on Twitter. A shot on the left and you'll get a band of options by shared topic (for example to vote up or down to vote, share and comment). This does not mean that Relay has limited customization, App offers The Change Layout Capacity As a User considers more appropriate for their tastes. And given its good reputation between Android users, many iOS users do without question when they are getting an iOS version of the app. Download relay for Android 3. Apollo for Reddit (Best Reddit App for iOS) Photo of Christian Selig on Apple App Store Price: Free / \$ 4.99 While Relay is a top-class choice for many Android users on Reddit, users iOS have their choice. Many users have praised Apollo for the facility with which they are able to use the application. They also said that the application is far better than the official reddit application. The application is full of functions, including the possibility of choosing a theme, change icons, and remove ads on the app. Despite the new features added to the most recent app update, the application continues to run smoothly and easily. Apollo for iOS 4. Boost for reddit Photo of rubA © n A © n Mayayo on Google Play Store Price: \$ 2.00 A \$ 10.00 For Boost for Reddit is another decent alternative for the official Platforma S application. It combines functionality and design. It has the required basics when using Reddit how to vote for a topic up or down, commenting on a shared theme, sharing the topic, and many others. Users can change the look of the interface by choosing a theme among the thousands of color options in his own And customize the API S navigation interface for Subreddit. The recent app update says the application now supports arrivals with more images, reddit surveys rendered visible on a post, and many others. Boost for Reddit 1.12.1 It's out! Ddd pic.twitter.com/yqh9i8ncz A push for reddit (@boostforeddit) 10 May 2021 What's more, is that the application supports an initial screen widget so as not to arrive to lose the last on Reddit. Download Boost for Android 5. Joey for Reddit Photo by Codesforliving from Google Play Store Price: free / \$ 19.99 There are a couple of common denominators These alternative reddit apps have: vote from a topic up or down, comment and share. But with Joey for Reddit, you have given the possibility to monitor comments and receive notifications every time they are sent, at the top of this, the application allows you to download videos from apps and hide the messages you have already read or interacted with. App users say that the price to get rid of ads in the app is expensive, but Joey for Reddit remains to be one of the best Reddit Apps there is for Android. Furthermore, the application is highly customizable, which others seem to stay back. As with other applications, there is a learning curve in the use of Joey for Reddit, but once to get the block of it, which knows what you could find. Download Joey for Android 6. Slide to Reddit Photo by Carlos Crane on Apple App Store Price: free / \$ 4.99 Slide is a reddit alternative application full of functionality with a simple user interface. With the wide range of features, slide makes it easy for anyone to use the application to read the topics on Reddit. The usual suspects that make a reddit an attractive alternative application are present in the presentation. However, as the mode supports offline display playback when synchronizing the subreddits before going to a place where there is no internet. In addition to being customizable by the Anyone's suit, slide is available in a free version and pro with the added value offer the latter that is won't get on the free version. Of course, the pro version free of the annoying full-screen ads. Download slide for Android download slide for iOS 7. Narwhal for reddit Photo by Rick Harrison on Apple App Store Price: Free / \$ 3.99 Narwhal is a free reddit client for iOS, defined as a gesture-based application. Gesto-based applications are known for how the user interface is usually navigated. In practice, everything you do on this application is just hitting the and touching. It is not a secret to any reddit user who before Apollo, Narwhal is the best Reddit application for many users using an iOS device. And so far, that continues to be one of the decent alternative reddit applications. What we like about this application is the display mode of information on the screen without necessarily making the experience of the limiting user. While in-app purchases would unlock many added features, the basics of which this application was made are all for free. Download Narwhal for iOS 8. Reader for Reddit Photo of Nonce Moscata Studios LLC from Apple App Store Price: Free / \$ 2.99 Reader is another decent reddit application for iOS. While it makes most of the other reddit features that are in the applications we have already listed above, it has another feature that makes this application remarkable. This application has a two-column view that seems to organize the flow of arguments in a clean and legible style. If you want a change in terms of exposure, you can change the timeline, like the flow display to the two view We also like how legibility is not compromised in this application by switching the theme from light to the dark mode and vice versa. This application is also a feature-rich application. Some features include support for multiple login account, Chromecast support, full-screen reader mode, and manage customized subreddits among others. Download Reader for iOS 9. Beam for Reddit Photo of Awkward from Apple App Store Price: Free Many users who are in Reddit Round for Beam Like their Go-To Reddit App with its most refined and integrated design. Beam makes navigation content on reddit easier in of user interface and readability. The recent App update integrated the use of the low light display for efficiency. However, it is the security function added in the use of the radius that attracts our attention to this app. It allows you to protect your app from your eyes to wear as what the app of the Vault would do. And the only way to get access is to scroll your biometry's fairly beautiful feature, especially if the topics you follow are things you prefer rather under the rag. Download the beam for iOS 10. Now for Reddit Photo of Phyllora from Google Play Store Price: free / \$ 3.99 Here is another good Alternative Reddit app for Android users. If you are looking for a reddit app that makes you browse easily and integrate the functionality with an easy user interface, now for reddit is the best app for you. Check the boxes we are looking for in the best reddit apps, including vote, comment, save, hide and share reddit content. We mentioned the facility you are able to watch videos of Tendency on Reddit TV in this app? But it's the simplicity of the user interface that makes this app works. There are not many complications and static elements to crash the app. Download now for Android 11. Sync for Reddit Photo of Red Apps Ltd from Google Play Store Price: Free / \$ 4.99 Sync is another decent alternative for official reddit. It allows users to customize the user interface at their leisure without sacrificing functionality and space. Users share the same experience with images, videos and selfText previews when using synchronization for the Reddit app. It is based on functionality and gesture, so you never miss anything at a glance. More recently, the app suitable for moments by changing and including support for AMOLED display and night themes. Synchronization is also available in a pro version that eventually removes ads and offers more functions. Download Sync for Android 12. Reddevelopment Photo of Kirkbushman from Google Play Store Price: free Reddevelopment Offers a different reddit user experience with a user-friendly user interface. This is given to this third-party reddit app is a good and elegant finish, which many users find attractive eyes. The app remains to be in a "work-in-progress" status for developers, but you may already download it for the process. The feature features include easy access to sub-discs, upon-ups or downvoting topics, commenting, sharing and so on. The app is one of the app based on the gesture we have listed in this article, so navigation is as easy as one, two, three. Download profides for Android 13. RedReader Photo of Quaqbadger from Google Play Store Price: Free Among the best Reddit app options that we have listed so far, RedReader is certified without advertisements because of its open source nature. It is also based on gesture, so it is not complicated to use for browsing They are trendy agents on the Reddit universe and the Internet as a whole. Of all things, it is the user interface of the app and the display that make this app captivating. In addition to this, the app resembles most of the other alter Native Reddit app that we have listed so far. It is a decent alternative, especially if you are looking for an app that reads the readability at the top of the list. Download RedReader for Android 14. ViewDeo Free Price: Free Reddit is more than a simple site full of text because the platform is also a damaging of photos and trendy videos. ViewDEO is a third-party app specialized in the download of your favorite Reddit videos. The process should not come as a stranger to anyone used to download videos from other social media platforms - more, so if you have familiar with how to download i of Twitter. Any conscious reddit user knows that videos can easily go fast as they came. This app is a decent tool to have if you are in a
