Honor find my device

How to find lost honor phone. Find my honor phone.

To receive additional support, please select the following methods: Thank you for your feedback! Sometimes a nuisance occurs during which smartphones are lost or stolen. What to do then? In the article we will discuss in detail how to find the Honor phone in the event of a loss or theft. By activating the remote control function of the device, Google has taken care of these situations and has developed a special system that allows you to remotely control your smartphone and locate it. The search procedure is provided free of charge for all Android users. But, initially, the user must activate the option. It is recommended to do so immediately after purchase: Go to the Google Play Marketplace and check for updates on installed Google services. Open "Google Settings". Go to "Remote Usage". Make sure Remote Search and Remote Block are enabled. The first option will allow you to further familiarize yourself with the location of the device on the map. And the second paragraph allows you to block your phone from your Google account. For "Remote Search" to work, you must first provide access to geolocation in the "My Location" section. Then follow the link and log in to your account. We recommend that you use your Google Apps profile. The system will redirect you to the "My Devices" page. Choose your device. The program will show the location of the phone. To erase information from your phone remotely, you need to: Choose your device. Click on "Lock Settings". Next "Submit". At the top of the screen, click on the notification.. Check the boxes next to all parameters and activate. You also need to make sure that a specific option is enabled: Go to your phone settings. Select the Security and Privacy tab. Next to "Find device", move the slider to "On". How to find an Honor mobile phone in case of loss One of the most unpleasant situations is theft of the smartphone or its loss. The chances of the person who found it returning it are minimal. But, there are several ways in which the user can find the device. Below we will consider in detail what to do in such situations. Call number How to find an Honor phone if lost? Just make a phone call. Maybe the phone is near you, and you will hear a melody, or what you found will be a respectable person. Make an appointment with him. Despite the possibility of finding the leak, it is a flaw in making an outgoing call. After all, if you really dropped it in a public place, then passers-by, who don't differ in good intentions, can hear the call. Search Google Account The most effective method is to search for a mobile account with Google. The main thing is to configure and authorize your own Google, as demonstrated at the beginning of the article. We will learn how to track an Honor 7, 8x, 9 Light, 10 smartphone or other Huawei phone model. Track on Android site Instructions for for a gadget through the site: Stop at. Please log in and select the desired device from the list. The system will show the mark on the map where the phone was last located.. If a network, for example, mobile Internet or Wi-Fi, works on a lost smartphone, then remotely you can: Send a call. Lock device. Start cleaning. Call through Google search service You can find an Honor phone through a special function in the call service «Research Google.» The advantage of a call using the presented system is that the program will maximize the volume of incoming calls. This method will increase the chances of finding a smartphone if you have lost it at home or nearby. Device lock A lost phone can also be blocked via the application. Login to your Google account on another smartphone. After selecting the necessary gadget in the list, click the corresponding item. Initially, we recommend setting a complex password so that no one can unlock except you. Cleaning of the device The third method available in the system is data cleaning. Remember, after this procedure is performed remotely, the Google account will also be deleted on the missing phone. That is, you lose access to it through the service. The implementation instructions are the same. You need to enter the profile, select the device and follow the system instructions, choosing the appropriate item «Clean». Alternative search options There are other search options. However, methods are ineffective and only in rare cases can give results. Pay attention to sites with ads and do not forget to write a statement to the police. Leaving your ad with the request to return your phone to Avito or in V Kontakte groups is not always a good decision. In fact, on the Internet there are many scammers who take advantage of the current situation and try to deceive. If you have received a call and you have been offered to return your mobile phone only after payment through the transfer through the terminal, then do not accept. How to deal with a gadget theft? Some are interested in the question «What if the gadget is still stolen? First go to your Google profile and block. The chance that the attacker did not turn off the phone is small, but it is worth trying. Then go to the police and write a statement. What to do if the phone is off or there is no internet connection? If your smartphone is not on and there is no network connection, then you can find it via IMEI. It is a special code with a length of 15 characters. To find this number, compose a combination * # 06 # The code must be provided to law enforcement agencies that send a request for information on the SIM cardmobile telephony. Cell phone companies on the satellite will find the location of the smartphone. Thanks to Android, you can easily locate your Huawei phone. Find out how positioning works in this practical tip. For the links on this page the merchant may pay a commission, e.g. for marked or green underlining. Most Huawei smartphones have Android as their operating system. This allows you to easily use Android device search to find your Huawei phone.To enable positioning, you need to use Google's "Find My Device" app. Download the app and start it. Give the app access to your location. Afterwards, the app is ready and can help you find your device. If you want to find your phone, you'll need to access the Find My Device app using your Google data on another smartphone, or simply use a computer browser and the dedicated app. If the GPS is on, your location is detected directly and displayed on the map. If your smartphone is unable to send the current location or is unreachable, the last location and time you were online will be displayed. If your smartphone is close to you, but you can't find it, you can also click "Let ring" for positioning. This way, even in silent mode, your phone will ring out loud and you will be able to find your smartphone. You can easily locate your Huawei smartphone by searching for Android devices. (Screenshot: Puia Zahedi) If you've lost your Android device or Wear OS smartwatch, you can locate it, lock it, or delete its data. On Android devices with a Google account, the "Find My Device" option is automatically turned on. Learn how to make sure your device can be tracked when it is lost here. You can find, block or delete data from your Android smartphone only if: A Your smartphone is turned on. You've signed in to a Google account. A Your smartphone is connected to the Internet via a mobile data connection or WLAN. The smartphone is visible on Google Play. Tracking has been activated. A The "Find My Device" feature is activated. If you used your lost smartphone for two-step confirmation, you'll need a replacement phone or a backup code. Remotely locate, block, or delete Go to android.com/find and sign in to your Google account. If you have multiple devices, click on the device you lost at the top. If you have more than one user profile on your phone, sign in with a Google account located in the main profile User profile A notification will appear on your lost smartphone. You'll see where he is on the map. The location is approximate and may not be 100% accurate. If your pixel cannot be found, the last known location will be displayed, if available. Select from what you want to do. If necessary, click Activate on "Lock" and "Delete." Let the bell ring: The smartphone rings for five minutes at full volume, even if it is set to silent or vibration. Lock device: The phone is locked by PIN, sample or password. If you haven't set up a lock yet, you can do muore now. You can also display a message or phone number on the lock screen so that a potential finder has the opportunity to return the phone to you. Delete device: This will permanently delete all data on the smartphone (this does not apply to SD cards under certain circumstances). After that, "Find My Device" is no longer available. Important: If you find your pixel after deleting all the data, you will probably need the password of your Google account to use it again. Device protection information Tip: If you have linked your pixel to Google, all you have to do is enter Search Phone into Google Search to locate or ring the bell. Using a Locate app, open the Find My Device app on another Android smartphone or tablet. If the app isn't already installed on the other device, download it from Google Play. Log in a. If you have lost your own device, tap Continue As [Your Name]. If you're helping a friend, tap Sign in as a guest and ask your friend to sign in. Proceed as described above.
