Gate Bridge is a railroad bridge in New York City, United States. The bridge carries two tracks of Amtrak's Northeast Corridor and one freight track between Astoria, Queens, and Port Morris, Bronx, via Randalls and Wards Islands. Its main span is a 1,017-foot (310 m) steel through arch across Hell Gate, a strait of the East River that separates Wards
Island from Queens. The New York Connecting Railroad began construction of the bridge in 1912, and it opened in 1917. The main span, a two-hinged arch flanked by stone towers on either bank of Hell Gate, was the world's longest steel arch bridge until the Bayonne Bridge opened in 1931. It is one of the few rail connections from Long Island, of which
Queens is part, to the rest of the United States. This panoramic photograph shows the main span of the Hell Gate Bridge, with Wards Island on the left of the image and Astoria on the right. A tugboat tows a barge in the foreground towards the Hell
