By Liz Jacobs i download image by michanolimit from Fotolia.com Mozilla Firefox is a Web browser similar to Internet Explorer or Google Chrome. The browser is a part of the Mozilla Application Suite. Firefox makes downloading movies simple because once you download, a window pops up that lets you immediately access the download. Downloading a movie in Firefox is very similar to downloading a movie in any other browser. However, the download window looks different because Firefox has it's own unique browser interface. Go to a site like Netflix, Movie Downloads, #1 Online Movie Downloads, Joost or Hulu. (See Resources and References). Sign up for the site. Some sites offer a 30-day free trial. Some sites listed are completely free. Select the category "Films." Click on the film genre you want to see such as comedy, drama or horror. Click the particular film you're interested in. Click "Download." Some sites, such as Hulu, don't include a download button. Their movies stream over the net. To download them, go to a site like KeepVid, Video Downloader or Vidmonkey. Copy the URL of the movie you'd like to download. Put the URL in the box on KeepVid, Video Downloader or Vidmonkey. Click "Submit," and your movie will begin downloading to your computer. Click on the file from the download window. Click "Open." Your movie will begin playing. There's nothing more frightening than an intruder in your home — especially when the unwanted visitors aren't even human. It's an unsettling invasion of privacy in the place where you're supposed to feel the safest, and oftentimes you'll come to realize that your house has a much more disturbing history than you ever could have imagined. It's these feelings of fear, discomfort, and dread that make the haunted house tale one of the most beloved in the history of horror. Admit it, you've watched a haunted house flick at home and slept with the lights on for a few days afterward, or seen ghostly apparitions that don't exist. The best horror films get a rise out of you that you never even knew you needed... because life's no fun without a good scare, right? Below are 8 of what we think are the best haunted house horror movies and TV shows that will make you question every door creak or light flickering for years to come. American Horror Story: Murder House (2011) Rotten Tomatoes: 73% The season that started it all... and arguably the best one since airing, they still haven't pulled off a better plot twist than Violet being unknowingly dead for half the season. In our opinion, this is the best haunted house tv series ever made. A bold statement, but it's that good. Paranormal Activity (2009) Rotten Tomatoes: 83% Technically, it's the female protagonist Katie Featherston that's being followed around by a ghost, not the house, but this film is still lots of spooky fun. Any horror enthusiast will remember all the hype around Paranormal Activity, with people jumping out of their seats in the trailer and critics hailing it as the scariest movie of the decade. We wouldn't go that far, but it's definitely one of the best haunted house flicks in recent years. It's been over a decade, and that ending still sticks in people's minds... The Sixth Sense (1999) Rotten Tomatoes: 86% Creepy kid? Check. Jump scares? Check. Twist ending that you definitely didn't see coming? Check. Everything about this horror classic is iconic — from the famous horror quote, "I see dead people" line to the surprise ending that made M. Night Shyamalan a (haunted) household name. Like any good paranormal movie, the human characters are very human, providing emotional arcs that keep you invested and remind you that plenty of monsters are very much alive. Rose Red (2002) Unlike IT, this TV miniseries from Stephen King didn't go on to become a hit film franchise (yet,) but it's still an underrated haunted house story. It takes place not in Maine, but Seattle... in a mansion with a deadly history and an uncanny ability to change shape and size every time you step through the door. As you watch the secrets of the mansion come to life, you'll be reminded by Stephen King is forever the godfather of the horror genre. The Haunting (1999) Rotten Tomatoes: 16% Based on Shirley Jackson's novel The Haunting of Hill House (not to be confused with the series, we'll get to that later,) this film challenges the age-old question surrounding paranormal encounters. Is some crazy sh** happening, or am I just losing my mind? Researchers study a group of siblings as they're locked inside an old-timey mansion, and as you can imagine... it's not pretty. There's a lot of horror cliches and overdone CGI, but it's a good pick for a scary movie night at home. The Conjuring (2013) Rotten Tomatoes: 85% Sometimes the paranormal entities in a home are harmless and just want to play. Other times they're the ghost of an accused witch and baby killer who sets out to murder anybody who moves into her old house. Not cool. Bathsheba in The Conjuring is one terrifying spirit, and while multiple sequels have been released since this scary flick hit theaters in 2013... Annabelle the doll and the Nun have nothing on her. The Changeling (1980) Rotten Tomatoes: 82% An oldie but a goodie... this film follows a New York City composer as he moves into an old Victorian mansion after the devastating loss of his wife and child. Most people probably wouldn't move into such a large and creepy house alone, but you do you. As you can imagine, a number of paranormal encounters begin to occur — from ghostly apparitions to loud banging. The story is a little slow to unravel, but you slowly learn that the mansion has a haunting history that's probably worse than you imagined. The changeling is often referred to as one of the best haunted house movies. The Woman in Black (2012) Rotten Tomatoes: 67% Sure, you may have wanted to shout "your ward, Harry!" a few times throughout the film... but Daniel Radcliffe gave a killer performance in one of his first roles after Harry Potter. He plays a widower who tries to uncover the secrets of a vengeful spirit who is terrorizing the townspeople. While it's a pretty typical ghost story, and doesn't necessarily bring anything new to the table when it comes to horror... the cinematography is gorgeous and the ending will have you on the edge of your seat. The Haunting of Hill House This is a relative newcomer but it is a really great haunted house series coming from Netflix. In this haunted tale, a family is coming to terms with a tragic past that all started when they moved into Hill House to renovate it. The series jumps back and forth between the past tragedies and the future where the family is unraveling as they try and figure out exactly what happened at Hill House. It's a must-see for any haunted house horror fans. There are more than 600 titles to dive into, enough to binge hundreds of hours of The Simpsons without watching even a fifth of what's available. Perfect for plane rides and frugal data spenders, the service's download function — which is exclusive to the mobile apps as of this writing — is so simple even Olaf could use it, and with every title eligible, it's just a matter of figuring out what you want. Here, we'll take you through the process of both downloading and deleting movies and shows from your Disney+ app. Explore Disney+ Downloading movies and shows on Disney+ Step 1: Select your download quality Before we have our fun, let's talk about file sizes. If you're hurting for storage space on your iPhone or Android smartphone, Disney+ includes a variable quality feature that allows you to sacrifice visual fidelity for a smaller digital footprint. Open the Disney+ app on your smartphone (iOS, Android) and click your profile icon on the bottom right. From there, navigate to App Settings > Download Quality. You'll see options for standard, medium, and high, the latter likely offering no higher than 1080p resolution. Step 2: Download your content Because you can view every Disney+ title offline, no guesswork or filter is required to find downloadable content. The hardest part of this particular task is figuring out what you want to watch. Once you've figured that out, all you'll need to do from the movie or show's listing is tap the download button, which is situated far right of the Play button beneath the title's logo. For shows, you can also find a separate download button next to each episode if you don't want the whole season. Disney takes care of the magic from there. It's a relatively quick download on Wi-Fi, especially at the lower qualities, so you can probably snag dozens of movies in those couple of hours before your flight if you forgot to do it the night before. Step 3: Watch your downloaded movies and shows All that's left to do now is enjoy yourself! An easy way to find your downloads is by hitting the download icon, which is always visible on the bottom right of the Disney+ app. All of your content will be listed here, sorted by when you downloaded. Tap the play button on the thumbnail of whatever you want to watch, and off you go. Episodes are listed a bit differently — they're nested under a single label, and tapping it will present all of the episodes you've downloaded for that show, grouped by season. You can also find these titles through regular searching and browsing. You'll know something is available for offline viewing if you see a smartphone icon where the download button usually sits. How much space do I need? The amount of storage space each title eats is based mostly on video length and resolution, and with other variables playing into the equation — the biggest being your quality setting — this number can vary greatly. We downloaded three movies of similar length and resolution — a few of the Star Wars films, which clock in at just over two hours each — to see how each of the options affect file size. The Empire Strikes Back at standard quality was 0.92GB for a 2-hour, 7-minute runtime, while A New Hope at medium needed 1.4GB for 2 hours and 4 minutes. That's a modest jump compared to Return of the Jedi on high quality, which needed 5.5GB for 2 hours and 14 minutes. For shows, a 39-minute episode of The Mandalorian on high quality takes 1.5GB, but just 270MB on standard and 424MB on medium. Finally, at a 3-hour, 1-minute runtime, The Avengers: End Game needs a whopping 7.1GB. Using the data above, you can work out a rough estimate of how much space you'll need to store everything you want. You can mix and match by adjusting your quality setting before you initiate the download. Now would also be an excellent time to set whether you require a Wi-Fi connection to download content, an option those on limited data certainly should consider. Disney+ enables Wi-Fi-only downloads by default. What's available? As explained above, everything in the Disney+ catalog can be downloaded for offline consumption. Whether it's an entire season of Darkwing Duck or every single movie from the Marvel Cinematic Universe, if it's on Disney+, you can download it. Unlike some other services, Disney+ is pretty loose for restrictions. For starters, you can download a single title on up to 10 different devices at a time, and you can download any of them as often as you want. The only thing Disney asks is that you connect to Disney+ every 30 days. How do I delete titles? Eventually, you'll want to make room for something new. Whether you wish to delete a single title or a bunch all at once, Disney+ makes the task delightfully simple. Step 1: Deleting a single title When you want to wipe titles from your device, the process is much more straightforward than downloading files. In fact, it will take you just a couple of seconds to delete something from Disney+. First, find your content by heading to the downloads section. You can access the download area by tapping the second icon from the right on the app's navigation bar. Find the movie you want to delete and click the smartphone icon to the right of its title. Select Remove Download, and the title will escort itself right off your smartphone's storage. If you're deleting a select few movies or shows, this is a simple way to do it. Step 2: Deleting all titles You have a couple of options for removing titles from your Disney+ page altogether after they have been downloaded. Within the Downloads section, you'll notice an Edit button on the top right-hand corner of your screen. Select Edit and, quickly, several squares will begin popping up next to each movie or TV title on your screen. You can click on those squares to select a specific title or choose several content options simultaneously. Click on as many squares that you would like to delete as you want. After making your selection, tap the trash icon to remove them permanently. In just a few clicks, you can modify your library to appear as you'd like. If you'd prefer to delete all of your downloaded titles, click on the Select All button to highlight every title. Then click the trash icon. If you accidentally highlight all of your titles but wish to un-select them, just tap the Select All button a second time. If you're looking for a faster way to mass-delete options, Disney+ does have a feature you can use. Tap on your profile icon on the bottom right of the screen. Then navigate to Settings and select Delete All Downloads. This option will trash all of your titles with just one single click, which will quickly free up space for whichever new titles you'd like to download next. Editors' Recommendations
