To learn how, see [Create new spreadsheets from a specific template](#). Known as "Today at Apple," these learning opportunities will teach you new product skills, and the classes are held at Apple Stores in your local area. Whether you're shopping for a new device, you need technical support or you need to send a device in for repairs, Apple makes it easy to explore the Apple Store locations near you. Visiting the Apple Store Shop Online You can visit Apple's website online to find store locations, get help with issues and to shop. For example, if you want to learn about coding and apps so you can build your own app, you can check out learning opportunities connected with app concepts, app design, coding skills and more. Use the navigational links at the top of the Apple website to explore Apple products such as iPads, iPhones, Apple Watches and Mac computers. The "Find a Store" web page allows you to enter your city and state or your zip code into the search field. Apple has support specialists on hand to assist by phone. Navigate through the same online support process to indicate your product and your problem. You'll then have the option to click "talk to Apple Support now." You'll see the wait time so you know how long it will take for the Apple rep to call you after you provide your phone number. Learning Apple Skills When you peruse the Apple website to learn new skills, you'll find some winning options that will help you really dive into the Apple knowledge base for photography, art, music and design. (To see which version of Numbers you have, go to Settings > Numbers.) To explore the Numbers User Guide, tap Table of Contents at the top of the page, or enter a word or phrase in the search field. MORE FROM QUESTIONSANSWERED.NET Quickly summarize, group, and rearrange data while your source data remains unchanged This guide helps you get started using Numbers 11.2 on your iPad. Apple also provides a map to help you find the stores. Getting Support Online Use the Apple website to get online support. You can also download the guide from Apple Books (where available). If you need more help, visit the Numbers Support website. To create a spreadsheet, you start with either a blank template, to which you can add tables, charts, text, and other objects, or a predesigned template that has placeholder elements, including text and images. By clicking the "Support" tab at the top of the home page, you'll see an option to chat with an Apple rep. Proceed through the prompts to indicate your product and the issue you need help with. There are many reasons for finding the closest Apple Store to you. You can also explore Apple Music and Apple TV if you're interested in these services. When you need to find an Apple Store near you, the Apple website makes it easy to search and find the closest shop. The next web page will give you the option to start an online chat with a member of the Apple team. Click on a subject, and you'll see classes and options to sign-up to attend. These templates, which are designed for purposes like personal finance, business, and education, give you a great starting point, and you can modify them however you like. To open Numbers, click the Numbers icon in the Dock, Launchpad, or the Applications folder. If the template chooser (shown below) doesn't appear, click New Document in the bottom-left corner of the dialog. See [Format a spreadsheet for another language](#). In the template chooser, browse templates by category or click All Templates, then double-click a template to open it. To create a new spreadsheet from scratch, double-click the Blank template. Do any of the following: Add your own headers and data to a table: Select a table cell, then type. Add other tables, text boxes, shapes, and images: Click object buttons in the toolbar. Arrange elements on the sheet: Drag tables and objects to where you want them. To name and save your spreadsheet, choose File > Save, enter a name, choose a location, then click Save. If iCloud Drive is set up on your Mac, Numbers saves the spreadsheet there by default. You can change the name of the spreadsheet or change its location at any time. To close the spreadsheet when you're finished working, click the red close button in the top-left corner of the window. Numbers automatically saves your changes, so you won't lose any of your work. You can also set Numbers to open new spreadsheets from a template instead of from the template chooser. Within each product category, you can peruse various items to learn more about them and even make purchases if desired. You'll also see the wait time so you know how long it will take to be connected with the representative. Speaking With Apple Reps by Phone Perhaps you want to have a voice conversation with a human to help you resolve your issue. You'll see phone numbers and full addresses of the stores as well as links that will allow you to see full store details including store hours. Once you enter this search information and click enter, you'll get a list of stores from which to choose. You can also hold down the Option key and choose File > New (from the File menu at the top of your screen). Note: If you'd like the ability to format table and chart data using the conventions of another language, choose the language in the bottom-left corner before choosing a template.
