Mario Kart is one of the strongest franchises of Nintendo with titles available for almost all Nintendo consoles and the handheld released over the past two decades and over 100 million copies sold - but Nintendo is watching a much larger potential audience carrying mobile phones Mario Kart. When Mario Kart Tour was announced for the first time more than a year ago, online reactions were a mixed bag. Some people were rightly justified on the prospect of playing Mario Kart on their phone, while others were worried about the way a free Mario Kart app could be bogged down with micro-transactions. Now that closed Android Beta for Mario Kart Tour has started, we are starting to see screenshots and video clips forgive by Brazen Beta Tester who break the rules of beta. Along with those losses, we have completed some other impressions from all over the technical news sector to make sense for what Nintendo led to the table. Family gameplay is fun and fascinating and all your favorite Mario Kart characters, carts and courses included - although most things are hidden in the box-Sky style prizes system. Designed to be played with With a single simplified hand - similar to Super Mario Run. Nothing we saw or heard so far is set in stone, as well as the nature of beta tests. The Verge mentions in their first glance the beta that together with the stars, to the green gems and coin systems, the game also includes a resistance system with hearts that run out every 15 minutes and can evidently be filled with in-app purchases. Having only seen the second-hand gameplay movie and the first impressions from other game journalists, he feels honestly as Mario Kart's tour is modeling to be a shell of dry bones of what should be a Mario Kart game. It seems that the Box Box system will run you in a way you learned with the growth of each race just grinding to earn enough coins or gems to get another possibility to unlock the character you actually want to play. These gameplay restrictions feel particularly strange, since this is the same franchise that has left that the eight people connect to wireless mode using a single cartridge with Nintendo DS. Of course, I'm trying not to pass the judgment on a game that is still in the initial phase of beta. The game should see a wide release sometimes this summer and hopefully, so we will have a clearer look at the game and mechanical modes - because if the main gameplay is fun and holds up to the reputation of the series, the Nostalgia -Factor alone could make Mario Kart Tour one of the biggest games of 2019.
