For more incompetent. The House of The Dead Overkill is a shooting game in first person, on rails, in which players must shoot all that moves on the screen, which will normally zombies (or mutant, as here they are called). Basically the game is virtually identical to the original, so you can enjoy the three campaigns that make up the story (Palace of Pain, Trauma ballistic, and naked terror of the Pope), plus one in the most exclusive to this version of Android, called Jailhouse Judgment. The most significant change in The House of the Dead Overkill: The Lost Reels is the new control system. Now we will be able to choose between using the accelerometer of the terminal, getting more fluid experience, but less accurate; or control the use of touch, so simply need to press the screen to direct the spotlight. In addition to the story mode, it takes a couple of hours; The House of Dead Overkill: The Lost coils includes a survival mode Fine, in which we will be killing the zombies until you get bored ... or the zombies will kill us, that it is very possible. The home of Dead Overkill: The Lost Reels is a first-person action game, very funny, a perfect combination of excessive blood and humor, to create a refreshing refreshing experience the genre. House of the Dead 3, screenshots: you could or can have familiarity with the long run and a very popular home of the dead arcade games. Following a long tradition of Games Lightgun, Hold 3 pitches against the wave after the wave of enemies in an on-road rifle experience. The games are incredibly simple business, with a little more for the player who make the gun along the bad zombies and their minion standards and recharge and try to get to the end of the game without throwing enough pound coins in the car to buy you Same a beautiful stone cottage from a brilliantly sliding river. In fact, this cost problem is the only thing Howd 3 on the PC really offers. Once Shell Out Twenty Quid you can play this game as many times as you want. That, if you are in the same way afflicted by Leonard in Memento, it could be a realistic way to go alone long days alone at home. There is the parveny of a plot, with regard to a secret project went wrong, the daughter of one of the scientists of that project and a shirtload of zombies. Blah, blah, blah. You may want to watch movies if you bought the game and try to justify the expense, otherwise they are completely forgotten and redundant. After all it is an arch conversion. The graphics are not too bad. Some of the rooms are impressive in their reach and there is a lot of variety for non-death creatures that you have to blow away. The freshness of the high resolution of the PC is not disappointed by a terrible timing and is certainly a very colorful game. There is a lot of blood if you choose so, even if it is rather cartoony and wounds on the zombies look more like explosive raspberries than wounds from firearm. The animation is not so hot, especially central characters, which move like puppets with intestinal control problems. Zombies are practically confined to stir or flinging alone, so a midway attempt of animation works perfectly for them. If it were not for the listless animation and the insistence on the whole text to look horrible, then HODD 3 would push a grade B for its images. House of the Dead 3but There is no way where you can escape the pure gallopsy of its gameplay. On the positive side, you can happily play this game with a beer in your hand if you are using the mouse. And it would probably be a little more fun if I had one of the nine lightguns that were sold to PC users. And it won't take you forever for On the negative side of things, this is little more than computerized whack-a-mole. I played flash games more than them. It is ridiculously easy with the mouse, without problems with the simple keyboard and somewhere in the central infidel if you use a gamepad. Without the Lightgun there is really no gameplay. Just click, click, click, click with R R Reload, click Click Infinity. Occasionally there are leaders to kill, which means exploding at the same weak point until they go away. You will often come to other humans to save. Manage to kill the bad guys who surround them over time and you have any more life. And this is practically everything there is. You could see everything that the game has to offer in an hour's game in an hour. There is a time attack mode to challenge yourself with yourself, if you are really inclined.
